

The Struggle Is Real!

WHAT TO DO WHEN SUPERVISEE PERFORMANCE IS LESS THAN SATISFACTORY

JULIANA O. MILLER, MS, CCC-SLP
SUPERVISOR/FAULTY OF COTL

1

Disclosures

Financial Disclosures

- This presentation includes discussion about training programs, and I am employed by University of South Carolina to coordinate practicum placements. University of South Carolina paid for my registration for this conference.

Non-Financial Disclosures

- This presentation includes discussion about training programs, and I am employed by University of South Carolina to coordinate practicum placements.

2

Frame it up!

We must be fair to our supervisees as we work to train them

We must hold the welfare of our patients paramount to all other concerns

3

Being a Gatekeeper

"...infrequent experiences with marginal students seem to be inevitable despite our best efforts of prevention and intervention. Although we have an obligation to provide intervention and support to marginal students, it is important to insure that only qualified and competent professionals enter the workforce and achieve certification" (Shapiro, 2002).

SHAPIRO, D. A., COLLETTRE, B. P., & BROTHERTON, W. D. (2002). GRADUATE STUDENTS WITH MARGINAL ABILITIES IN COMMUNICATION SCIENCES AND DISORDERS: PREVALENCE, PROFILES, AND SOLUTIONS. JOURNAL OF COMMUNICATION DISORDERS, 35(1), 45-74. DOI: 10.1016/S0021-9894(01)00050-8

4

ASHA's Supervisory Requirements

5

ASHA Requirements For Supervising Students

ASHA Certification

Sufficient knowledge and experience to mentor/educate

Direct supervision appropriate to the level of knowledge/skill level of the student

At least 25% of the total contact with each client/patient, periodically throughout the practicum

Supervision adequate to ensure the welfare of the client

STUDENT SUPERVISION PAGE 10.01 RETRIEVED JANUARY 10, 2020 FROM
<https://www.asha.org/standards/ethics>

6

ASHA Requirements For Supervising CFs

ASHA Certification throughout the entire CF experience (divided into three equal segments)
 A *minimum* of 6 hours of direct and 6 hours indirect observation during each segment
 Must provide performance feedback to the Clinical Fellow at least once during each segment of the CF using the 2020 Clinical Fellowship Skills Inventory (CFSI) form.
 Ensure all skills are observed and evaluated during each segment

A GUIDE TO THE ASHA CLINICAL FELLOWSHIP EXPERIENCE (P.O.D.) RETRIEVED JANUARY 24, 2020, FROM <https://www.asha.org/clinical-fellowship-experience>

7

Asha's Additional Requirements For All Supervisors (Effective January 2020)

CCC for at least 9 months
 2 hours professional development in the area of supervision after earning CCC

STUDENT SUPERVISION PAGES (P.O.D.) RETRIEVED JANUARY 24, 2020, FROM <https://www.asha.org/clinical-fellowship-experience>

8

Best Practice for Supervision

9

Continuum of Supervision

There are many ways to supervise that are "right"
 Different strategies/styles are appropriate at different points in time
 Factors include needs, skills, viewpoints of supervisor and supervisee, setting
 Supervisor's dominance decreases as supervisee's participation increases
 None of the stages are time-bound
 Place on the continuum may change based on the task/patient/situation/setting

MCCRAE, S., & BRASSER, J. A. (2003). THE SUPERVISORY PROCESS IN SPEECH-LANGUAGE PATHOLOGY AND AUDIOLOGY (2ND ED.). BOULDER, COLORADO: WILEY.

10

Anderson's Continuum of Supervision

11

Dreyfus Model of Skill Acquisition

Developmental- based on student performance and experiential learning
 Situational- focus on actual performance in particular situations, compared across time
 Skill- acquired by following abstract/formal rules, while learning through experience
 Learner must:

- Be open and responsive to improve over time
- Learn to recognize whole situations in terms of past experiences
- Move from textbook knowledge to experience-based responses

MCCRAE, S., & BRASSER, J. A. (2003). THE SUPERVISORY PROCESS IN SPEECH-LANGUAGE PATHOLOGY AND AUDIOLOGY (2ND ED.). BOULDER, COLORADO: WILEY.

12

Dreyfus Model

13

Adult Learning

Self-directed

Enter the learning situation with past experience

Need some impetus to trigger a "need to know"

Approach learning with a task-centered focus

Intrinsic and extrinsic motivation

Need to know *why* they should learn to do something

GORDON PERREY, M., & WARDEN, P. R. (2013). SUPERVISOR AND SUPERVISEE PERCEPTIONS OF AN ADULT LEARNING MODEL OF GRADUATE STUDENT SUPERVISION. PERSPECTIVES ON ADMINISTRATION AND SUPERVISION, 28(1), 12. DOI: 10.1080/0033252.12

14

Clinical Supervision Model Based on Jarvis' Principles of Adult Experiential Learning

Non-Learning Response

- Presumption
- Non-consideration
- Rejection

Non-Reflective Learning Response

- Pre-conscious learning
- Practice
- Memorization

Reflective Learning Response

- Contemplation
- Reflective Practice
- Experimental Learning

WARDEN, P. R., & GORDON PERREY, M. (2013). APPLYING ADULT EXPERIENTIAL LEARNING THEORY TO CLINICAL SUPERVISION: A PRACTICAL GUIDE FOR SUPERVISORS AND SUPERVISEES. PERSPECTIVES ON ADMINISTRATION AND SUPERVISION, 28(1), 311. DOI: 10.1080/0033252.13

15

Expert vs. Novice Supervisors

Expert

Positive view of the process

Regular feedback

Listen before giving advice

Novice

Increased stress

Less consistent feedback

Less frequent feedback

More focused on client than on supervisee

TALAMON, K. L., & COOPERSON, S. (2017). CLINICAL SUPERVISION IN A MEDICAL SETTING: A PRELIMINARY STUDY ABOUT THE PRACTICES AND BELIEFS OF EXPERT AND NOVICE CLINICAL SUPERVISORS. PERSPECTIVES OF THE ASHA SPEECH-HEARING SOCIETY, 35(1), 15-16. DOI: 10.1044/1059-1015(2017)001.0

16

Common student errors

Feedback not specific enough to help clients learn

Incorrect productions ignored

Too much time spent on things that don't matter (e.g. coloring, explaining reward system, playing a game)

Off-task activities

GILLAM, M. B., ROUSSEAU, C. S., & ANDERSON, J. L. (1988). FACILITATING CHANGES IN SUPERVISEE'S CLINICAL BEHAVIORS. JOURNAL OF SPEECH AND HEARING DISORDERS, 53(4), 729-735. DOI: 10.1044/1093-1058.53.4.729

17

Effects of Interpersonal Relationships

Successful experience depends heavily on the relationship between supervisee and supervisor

Relationship should encourage the supervisee to identify strengths, pose questions, communicate concerns, share new ideas/information

Supervisor should use assessment tools to identify strengths, next steps to develop competence, promote improvement, and encourage self-reflection

Be clear about expectations/goals on both sides

Encourage open communication

FREDERICKSON, T., & MOORE, S. (2004). EFFECTS OF INTERPERSONAL RELATIONSHIPS ON SUPERVISOR ADMINISTRATION AND SUPERVISION. JELLS, 12, DOI: 10.1080/1043986042000162812

18

What students and supervisors want

FREDERICKSON, T., & MOORE, S. (2014). KEY FACTORS OF INFLUENCE IN CLINICAL EDUCATOR RELATIONSHIPS: PERSPECTIVES ON ADMINISTRATION AND SUPERVISION. JACI, 12. DOI: 10.1086/JACI.12.1.2

19

Productive Conflict in Supervision

Learning how to manage conflict results in a better experience for the supervisor and supervisee

Poor conflict control:

- Decreased learning, damage to relationship
- May start to hide difficulties from supervisors and disregard feedback

Good conflict control:

- Strengthened relationship, better supervision outcomes, professional growth for both sides
- Student more receptive to learning

Cause of conflict- miscommunication; differing expectations, personality types, supervisory/learning styles; insensitive criticisms/disapproving attitudes; supervisee resistance/defensiveness/irresponsibility/anxiety; lack of supervision; organizational dysfunction

NEELIS, A. C., HAWKINS, K. L., BECKHO, M., & WAT, S. (2011, OCTOBER). PRODUCTIVE CONFLICT IN SUPERVISION. ACES CONFERENCE, NASHVILLE. RETRIEVED FROM [HTTPS://WWW.COUNSELLING.ORG/-/media/1-2_2011-ACES-PROF-ARTICLE_01](https://www.counseling.org/-/media/1-2_2011-ACES-PROF-ARTICLE_01)

20

Conflict Control and Managing Conflict

Conflict Control

- Acknowledge that conflict is a natural component of supervisory relationships
- Communicate openly about conflict management
- Acknowledge/normalize feelings of anxiety about the experience
- Set explicit/measurable goals
- Provide clear/timely feedback
- Receptive/non-defensive demeanor

Managing conflict

- Proactively address concerns with supervisee
- Be mindful of supervisee developmental level, and provide appropriate level of support
- Recognize areas of strength and growth
- Provide structured, balanced, constructive feedback

NEELIS, A. C., HAWKINS, K. L., BECKHO, M., & WAT, S. (2011, OCTOBER). PRODUCTIVE CONFLICT IN SUPERVISION. ACES CONFERENCE, NASHVILLE. RETRIEVED FROM [HTTPS://WWW.COUNSELLING.ORG/-/media/1-2_2011-ACES-PROF-ARTICLE_01](https://www.counseling.org/-/media/1-2_2011-ACES-PROF-ARTICLE_01)

21

Effective Feedback

Be direct and straightforward

- Specific deadlines
- Clear instructions
- Written rules/expectations

Try to give verbal feedback as soon as possible (immediately following sessions, or at the end of the day).

- Consider a weekly "debrief"
- Be specific about what you saw (or didn't)
- Outline what they need to do differently

Follow-up with written feedback

- Official documentation
- Supervisor log or informal "worksheet"

Provide guidance for documentation

- Track edits in documents using "track changes"
- Utilize templates and "cheat sheets" for forms/reports, when possible
- Create outlines and agendas for written lesson plans, schedules

DURBIN, G. (2008, MARCH-APRIL). YOUTH MOVEMENT. COMMUNICATION WORLD, 1-4.

22

Data-Driven Supervision/Documenting Supervisee Performance

Objective data facilitates understanding and documents supervisee performance/supervisory efforts

Useful tools include

- Rating scales
- Tallying behaviors
- Verbatim recording
- Interaction analysis
- Individually designed methods
- Tools for analysis of behaviors and self-assessment

ANDERSON, J. L. (1988). THE SUPERVISORY PROCESS IN SPEECH LANGUAGE PATHOLOGY AND AUDIOLOGY. AUSTIN, TX: PRO-ED.

SWARTZ, G. A. (1994). INTERACTION ANALYSIS AND SELF-RATING: A SINGLE CASE COMPARISON OF FOUR METHODS OF ANALYSING SUPERVISORY CONFERENCES. LANGUAGE, SPEECH AND HEARING SERVICES IN SCHOOLS, 25, 67-76.

23

When Your Supervisee Is Struggling

24

What is going on?

Reasons for poor performance are complex, and are different for each individual

Nationwide shortage of externship sites

Increased mental health difficulties, which disrupts learning

Students who are stressed about income/housing/health do not perform to their potential

Remediation programs not well researched or standardized

Students from culturally/linguistically diverse backgrounds may have more difficulties during clinical placements (this has been shown across disciplines)

Failure to fail

DAVENPORT, B., HEWAT, S., FERGUSON, A., MCALISTER, S., & LINCOLN, M. (2017). STRUGGLE AND FAILURE ON CLINICAL PLACEMENT: A CRITICAL NARRATIVE REVIEW. *INTERNATIONAL JOURNAL OF LANGUAGE & COMMUNICATION DISORDERS*, 52(3), 328-337. DOI: 10.1016/j.ijlcom.2016.11.006

25

As soon as you realize there is a problem

Model the professional/clinical behaviors you need to see

Communicate with him/her about the issue verbally and in writing

Begin to maintain written records of all contacts/conferences

Document the deficits

- Students: grade performance, contact university administrator
- Clinical Fellows: document on CFSI form

26

What is a marginal student?

Sustained performance deficits in academic and/or clinical domains

Disproportionate investment of educational resources

High risk of failing to achieve competence, despite the time commitment required to teach them

Deficits in:

- Conceptual understanding
- Formulating goals/procedures
- Following through with suggestions

SHARPLE, D. A., GOSWETTER, B. T., & BROTHERTON, W. D. (2002). GRADUATE STUDENT INTERNATIONAL ANALYSIS IN COMMUNICATIONS SCIENCES AND DISORDERS: PREVALENCE, PROFILES, AND SOLUTIONS. *JOURNAL OF COMMUNICATION DISORDERS*, 35(4), 415-431. DOI: 10.1016/S0021-9894(02)00008-8

27

Types of difficulty

Lack of academic knowledge
Lack of clinical expertise
Lack of professionalism

SHAPIRO, D. A., COLLETT, E. T., & BROTHERTON, M. D. (2002). GRADUATE STUDENTS WITH MARGINAL ABILITIES IN COMMUNICATION SCIENCES AND DISORDERS: PREVALENCE, PROFILES, AND SOLUTIONS. JOURNAL OF COMMUNICATION DISORDERS, 35(5), 447-455. DOI: 10.1016/S0021-9894(02)00058-6

28

Characteristics of Marginal Students

Cannot perform independently in several areas
Poor clinical and/or academic performance
Do not recognize weaknesses
May be unaware their skills are lacking
Have difficulty accepting responsibility for their actions
May place blame on another individual (client or supervisor) or circumstance

PHILLIPS, J. E., & WILSON, M. W. (2006). IDENTIFICATION AND REMEDIATION OF AT-RISK STUDENT CLINICIANS IN AUDIOLOGY AND SPEECH-LANGUAGE PATHOLOGY: PERSPECTIVES ON ADMINISTRATION AND SUPERVISION. SEMIOTIC, 24, 305-322. DOI: 10.1016/j.semi.2006.03.001

29

Lack of Awareness

People who are less competent than their peers are often convinced that their skills are above average

The metacognitive skills used to *produce* correct judgement, are the same skills used to *recognize* correct judgement

- Top-quartile participants underestimate their ability/better able to assess their performance and the performance of their peers
- Bottom-quartile participants:
 - Inflated estimates of their performance
 - Did not gain insight by observing superior behavior of peers
 - Often attribute poor performance to an outside cause
 - Most pronounced when facing difficult tasks for which they do not have requisite knowledge

MEISTER, J., & DUNNING, D. (2001). UNBILLED AND UNBARNED DIRT: HOW DIFFICULTIES IN RECOGNIZING ONE'S OWN INCOMPETENCE LEAD TO INFLATED SELF-ASSESSMENTS. JOURNAL OF PERSONALITY AND SOCIAL PSYCHOLOGY, 79(6), 1222-1234. DOI: 10.1037/0022-3514.79.6.1222

30

Supporting Marginal Students

Some supervisors do not provide negative feedback because they are concerned about the supervisee's reaction, especially if the negative feedback involves the supervisory relationship or supervisee's professional behavior

Important to address skills *and* relationships

- Name the difficulty immediately
- Discuss without shaming
- Attune to developmental and relational needs of the supervisee
- Provide support
- Anticipate potential difficulties, and address them early
- Acknowledge your own mistakes
- Remain patient and transparent

GRANT, J., SCHOFIELD, M. J., & CHAFFORD, S. (2012). MANAGING DIFFICULTIES IN SUPERVISION: SUPERVISORS' PERSPECTIVES. JOURNAL OF COUNSELING PSYCHOLOGY, 59(4), 528-541. DOI: 10.1037/a0028880

31

Helping Marginal Students Improve

Regular feedback

Directive style of supervision

Supervisor-generated data

Joint planning

Role playing

Demonstration therapy

Structured observations

Remediation/coaching/improvement plans

Written supervisory contracts

Videotaping

SHAPIRO, D. A., OLSZTES, B. T., & BROTHERTON, W. D. (2002). GRADUATE STUDENTS WITH MARGINAL ABILITIES IN COMMUNICATION SCIENCES AND DISORDERS: PREVALENCE, PROFILES, AND SOLUTIONS. JOURNAL OF COMMUNICATION DISORDERS, 35(5), 422-451. DOI: 10.1016/S0021-9894(02)00039-6

32

Conflict Management

Conflict distracts from patient care and has a negative effect on patient outcomes

Conflict must be managed, rather than avoided

Being open-mindedness to the ideas and perspectives of others promotes positive outcomes

If the issue occurs once discuss the content of the issue; if it has occurred repeatedly, discuss the pattern of events.

Have the discussion when you are able to think calmly and clearly

Discussion in a private, preferably neutral, setting with enough protected time for the discussion

Participants in the discussion should feel they have been treated fairly and with respect

CHERTON, A., & LEMLEY, A. (2012). CONFLICT MANAGEMENT: DIFFICULT CONVERSATIONS WITH DIFFICULT PEOPLE. CURRENTS IN COLON AND RECTAL SURGERY, 26(4), 239-264. DOI: 10.1007/s00269-012-0170-8

33

Common Errors in Conflict resolution

- Avoiding the issue
- Softening the message with compliments
- Using non-verbal "hints" or subtle comments to address the problem
- Blaming someone else for the decision/request you are making
- Judging/blaming
- Being too vague in your description of the problem

OVERTON, A., & LOWRY, A. (2015). CONFLICT MANAGEMENT: DIFFICULT CONVERSATIONS WITH DIFFICULT PEOPLE. CLINICS IN COLON AND RECTAL SURGERY, 20(4), 259-264. DOI: 10.1007/s00383-015-0707-8

34

Difficult Conversations

- Define the problem
 - Begin with the facts from your perspective. Use "I" statements whenever possible.
 - Share appropriate/relevant information
 - Describe the gap between the expected and observed behavior
- Allow all parties to state their opinions and perspectives
 - Listen respectfully
 - Ask clarifying questions (without imposing your view)
 - Express empathy
 - Display active listening skills
- Brainstorm solutions and create a follow-up plan
 - Find commonality and acceptable compromises
 - Create an action plan that outlines who/what/when

OVERTON, A., & LOWRY, A. (2015). CONFLICT MANAGEMENT: DIFFICULT CONVERSATIONS WITH DIFFICULT PEOPLE. CLINICS IN COLON AND RECTAL SURGERY, 20(4), 259-264. DOI: 10.1007/s00383-015-0707-8

35

If you think your CF is not going to make it

- If CF is terminated or if mentor will not verify successful completion, complete the online CF Mentor Verification page and provide documentation for the negative recommendation
- Letter of explanation and supporting documentation
 - Signed Clinical Fellowship Report and Rating Form (must be shared with the CF)
 - May be asked to complete a CF Mentor Verification page
- The CF may complete a new CF or request an appeal

A GUIDE TO THE ABAAC CLINICAL FELLOWSHIP EXPERIENCE (2015). RETRIEVED JANUARY 16, 2020 FROM <https://www.abaac.org/abaac-clinical-fellowship-program-2015/>

36

What happens to a student if they “Fail” a practicum experience?

Remediation/coaching plan

Repeat practicum experience/modified practicum

Referral to support services for help with any academic/physical/mental/social issues that may have contributed to the problem

Not getting to count the clinical hours earned

In extreme cases:

- Probation
- “Counseling out” of program
- Dismissal from program
- Refusal to verify skills for ASHA certification application

SHAPING, D. A., COLLETT, E. T., & BROTHERTON, M. D. (2002). GRADUATE STUDENTS WITH MARSHALL ABILITIES IN COMMUNICATION SCIENCES AND DISORDERS: PREVALENCE, PROFILES, AND SOLUTIONS. JOURNAL OF COMMUNICATION DISORDERS, 35(1), 45-55. DOI: 10.1016/S0260-1261(01)00033-8
